

**1 Short characterization:** TRUCKER – the magazine for long-distance truck drivers. For 28 years, TRUCKER has been the specialized magazine for truck drivers. Month after month, new trucks and technologies are introduced and compared. Driving reports, service topics and exciting everyday reports complete the picture. The readers are primarily professional truck drivers covering long distances, as well as self-driving hauliers.

## Assignment, data medium, print-out to:

Springer Transport Media GmbH

Advertising department

Neumarkter Str. 18, 81664 München, Germany

**Data type:** To avoid problems, advertisements should be sent as a closed file format (colour ads have to be sent in the CMYK colour space; special colours and data in the RGB colour space cannot be processed). The customer has the responsibility for the repro quality and correct data transfer. In the delivered data, no corrections will be carried out by the printers.

## Production data:

All common design applications such as QuarkXPress, FreeHand, CorelDraw... offer the possibility to save a file composed of single objects in one complete file!

**Word and Excel files cannot be used!**

**TIFF:** Line masters with a minimum resolution of 1000 dpi, grayscale data with a minimum resolution of 300 dpi, 4c data (CMYK mode!) with a minimum resolution of 300 dpi.

**JPG or JPEG:** Here, the same requirements as for TIFF apply. In addition, due to the format (lossy compression), no quality guarantee can be granted in cases of strong compression.

**DCS:** Ideally, save your data in the DCS 2.0 format (with higher JPEG quality as a "Colour Composite Single file with 72 dpi"). Recommended only for 4c data and for current Adobe Photoshop versions 5.0 or later!

**EPS:** When creating EPSs, enclose all fonts in the EPS file, or convert the fonts into vector paths. Images as hi-res data! They must not contain JPEG compression (no JPEGs, Photoshop EPSs with JPEG compression, DCS 1.0 or 2.0)

**PDF:** When creating images, do not downsample the image to 72 dpi with Distiller or compress JPEG. All fonts must be sampled into the PDF. For 4c advertisements, separate the PDF according to the CMYK standard. Follow the print sequence of the colours (cyan, magenta, yellow, black).

**PostScript:** Use Post-Script Level2 data. Embed fonts, images as hi-res data!
